MEDICAL RESPONSE CATALOGUE

**When you buy from St John
100% of the proceeds help us
to save lives and improve
health care.**

Thousands of people trust St John with their lives every year

St John is at the frontline of health care, providing ambulance, medical, and rescue services across Papua New Guinea in people's time of need. We nurture resilient communities by ensuring free health education for people in schools and villages, and we promote safer health care by providing emergency medical life support training to doctors, nurses, and medical specialists in the public and private hospitals.

Our ambulance service serves the community, saves lives and helps sick and injured people access emergency health care 24 hours every day across the nation. St John's ambitious project is helping the government build a national prehospital care system to save more lives and assist the sick and injured to get reliable access to healthcare.

About St John

St John Papua New Guinea is a charitable, non-profit, health and public safety organisation operating as an annexe of government in accordance with the *St John Council Incorporation Act of 1976*.

We are building a national prehospital care system in partnership with the government. The system is saving lives and improving people's access to primary and emergency care.

Our Mission

We are committed to ensuring all people have trusted, reliable and quality healthcare when it is needed, wherever it is needed, whatever the circumstance.

We will pursue excellence in health education and the provision of essential medical services to prevent and relieve sickness and injury and improve people's health.

That illness, injury, and suffering are prevented or eased because first aid is a part of everyone's lives.

To provide responsive and resilient prehospital and primary health care across Papua New Guinea.

To reach the remotest corners of our country by air when people need help for maternal, neonatal or trauma emergencies.

To be the local medical service provider of choice for working families, business and industry.

That the people of Papua New Guinea value St John as a trusted, dedicated and inimitable organisation.

ST JOHN SAFE PROGRAM

**Does your workplace
meet the proper
standards for first aid?**

St John
SAFE

The St John Safe Program officially recognises workplaces in PNG that are ready for any first aid situation.

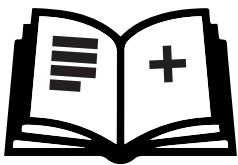

The St John Safe workplace Program officially recognises workplaces that are first aid compliant. It is a way of identifying and communicating to employees, clients and the public that you have the right first aid training, equipment and processes in place to deal with an emergency situation.

It is recognition that your workplace has met their first aid obligations and it is peace of mind for people knowing that they are in safe hands.

How does it work?

We will come out to your workplace and conduct a St John Safe Assessment, to ensure that you have the right systems in place to achieve a safe work environment and to mitigate risk.

Our first aid officer will compile detailed recommendations to assist you in becoming St John Safe. We will work with you to create a bespoke package that may include:

First Aid Training:
First aid training for your staff, assisting you in having an appropriate level of trained first aiders for the size of your business and nature of your work.

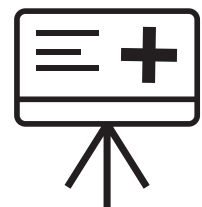

Defibrillators:
Provision of defibrillators, making this potentially lifesaving device much more accessible.

Included is training and regular servicing.

Kits: The appropriate number and type of first aid kits will be provided. Plus let us take over the responsibility for monitoring your kit levels through our restocking service.

First Aid Drills:
First aid drills to help your workplace put into practice first aid skills covered in training. Drills may be run on-site utilising your own first aid facilities.

How can your workplace be St John Safe?

Once your St John Safe Assessment has been completed and appropriate training, equipment and systems have been implemented you will be considered St John Safe.

You will be presented a certificate to formally recognise your St John endorsement.

Book your St John Safe Workplace Assessment today Call 303 1000

FIRST AID

RESPONSE

First aid for work, rest and play

Every home and workplace needs to be first aid ready. The range of first aid training and kits we sell are suitable for house and home, workplace and industry. We can also help develop bespoke solutions for specific projects, adventures or activities. We recommend a workplace has at least one professionally trained first aider for every 20 employees, and a first aid kit on every floor, vehicle and site.

**“1 in 20
employees
should be
first aid
trained.”**

Quality supplies you can rely on

We sell the same brands and products that our ambulance officers use to save lives every day. It's part of our commitment to making health care more accessible.

St John

FIRST AID COURSES

Training for work, rest and play

St John's commercial first aid training ensures your workforce is equipped with the first aid training to assist a sick or injured person.

As a student choosing St John, you have confidence that our 200 years of global experience designing and teaching first aid means you get quality at every corner.

Since 1957, St John has been delivering health and medical services to the Papua New Guinea community. We are the nation's largest first aid training provider and offer a range of nationally accredited and non-accredited courses to meet industry and individual needs.

We provide training in Port Moresby, Lae and at worksites anywhere in Papua New Guinea, which makes it easy for workers to gain or maintain their first aid qualifications. Our trainers come from a variety of backgrounds, enabling them to contribute real life experiences to the training environment.

Our courses go through rigorous appraisal to get the approval of our leading paramedics and doctors meaning that what you are taught is backed by medical professionals.

For more information please call **303 1000** or visit our website at www.stjohn.org.pg

St John

First Aid & Health Care Courses

Basic

- This short course will benefit the general public.
- This course gives you a basic understanding of first aid in a curated range of situations.
- You will be taught to perform basic first aid procedures to give CPR.
- 1 day course

Senior

- This course will benefit all settings those at work, home or for leisure.
- The course gives you an general grounding in first aid in a broad range of situations.
- You will be taught to perform senior first aid procedures, to give CPR and to use an AED.
- 2 day course

Advanced

- This course will benefit people working in higher-risk occupations or staying in remote locations.
- This course gives you an advanced understanding of first aid for a range of serious situations.
- You will learn advanced first aid procedures, how to give advanced CPR and defibrillation, how to manage an incident and other first aiders until professional medical assistance arrives.
- 5 day course

CPR

- An easy, short course for the general public.
- You will learn the skills to perform basic CPR to adults and infants.
- 4 hour course

Tiny Tots

- This short course is for mums, dads, carers and guardians.
- This course covers the fundamentals to protect a toddler or infant.
- You will learn how to give CPR to an infant, and how to manage:

PNG First Aid Kit

677502

Features:

- Waterproof canvas case
- Reflective strip
- Heavy duty stitching and zippers
- Multi storage sleeves
- Rigid base non-slip

Perfect for:

- Work
- Home
- Office
- Vehicle
- Outdoor Adventures
- Marine

RECOMMENDATION:

This kit goes well with the Emergency First Aid Course.

Tiny Tots Kit

640025

Dimensions: 265mm x 185mm x 90mm

Features:

An essential easy-to-carry kit for parents and carers of babies and toddlers, which contains useful contents to monitor temperatures, treat minor scratches and to manage unexpected accidents on the go.

Perfect for:

- Mothers and babies
- Parents
- Families

RECOMMENDATION:

Our Bebi First First Aid program is perfect for new parents. The course covers the essentials for keeping bub well.

Major Bleeding and Snakebite Module

This kit may save your life in a severe bleeding situation.

The Major Bleeding & Snakebite module is suitable for helping to treat heavy bleeding, particularly those caused by violence, knife or gunshot. At the same time, the two (2) snakebite bandages can be used to treat envenomation. The Module can be used on its own or as an add-on to our other kits.

Contents:

- Snakebite bandage (x2)
- Wound dressing No.15 (x2)
- Nitrile glove - Large (x2)
- Tape hypoallergenic
1.25cm wide
- Shears

Workplace Backpack Response Kit 677504

THIS PACK DOES NOT INCLUDE DEFIBRILLATOR

INDIVIDUAL CONSUMABLES MAY VARY FROM IMAGE SHOWN HERE FROM TIME TO TIME

Features:

St John AED backpack designed to securely carry your AED in mobile situations. Adjust the strap to securely fit your AED and case.

Made of polypropylene with three zippered compartments running the length of the backpack to store items. The black heavy duty zippers have long sturdy yellow pull tabs; easy grip design to open and close in any weather.

Workplace Modular Wall Mount 640060

Size: 38 x 32.5 x 20 cm

Features:

- 6 modules (which can be purchased individually)
- Strong metal wall mount with lockable key
- Can be mounted

Perfect for:

- Office
- Work
- Industrial Environments

RECOMMENDATION:

This kit is most useful with the Advanced First Aid or Senior First Aid course.

Workplace Plastic Box First Aid Kit

677502

Size: 400 x 220 x 200mm

Features:

Durable and portable case can be transported anywhere that accidents happen.

Perfect for:

- Office
- Work
- Industrial Environments

RECOMMENDATION:

This kit is most useful with the Advanced First Aid or Senior First Aid course.

E Scale Marine First Aid Kit (Non-Medicated)

616503

Features:

Packaged in easy access waterproof containers including detachable bracket for installation.

This kit conforms to Marine Board Survey Equipment Scale E Regulations. Medical items are required but not included in this kit.

Suitable for:

- Restricted passenger vessels (within 30 nautical miles of the coast)
- Fishing vessels within 200 nautical miles of the coast
- Australian Register of Therapeutic Goods ARTG-194063

FIRST AID PRODUCTS

FIRST AID KIT REFILL

FIRST AID KIT REFILL – WORK PLACE ESSENTIALS (refill pack) 677505

The Workplace essentials refill pack comprises of a range of comprehensive first aid components. Its suitable for medium to large working environments (Office warehouse, factory etc.) It is used to replenish all national first aid workplace kits from large national workplace (wall-mount / portable) to small national workplace kits.

DEFIBRILLATORS SAVE LIVES

**READY
FOR THE
RESCUE**

YOUR WORKPLACE NEEDS A HEART RE-STARTING DEFIBRILLATOR

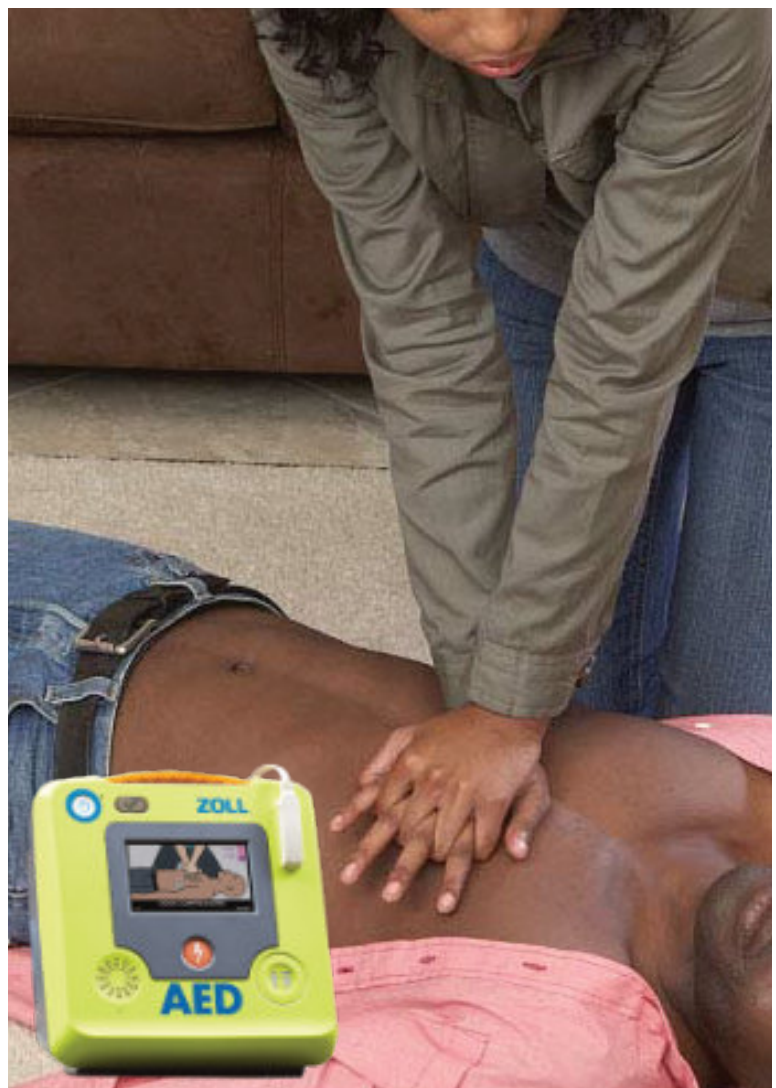

AEDs are recommended at workplaces, hotels and airports. Many businesses are choosing to be 'heart safe' by having a defibrillator (AED) available at their worksite.

If a person is in cardiac arrest, collapsed and not breathing their heart may need a controlled electrical shock to try make it beat properly again.

An automated emergency defibrillator (AED) is a fully automated medical device that detects if a person is in cardiac arrest by analysing the heart's activity. The AED gives instructions too. If the AED determines a person needs a shock to save their life, the machine will talk to you and then deliver the shock. If no shock is needed, the AED will give you instructions which you should follow.

AEDs are very safe and easy to use. A person can be taught to use an AED during one of our first aid courses. To have most life-saving effect, AEDs should be easy to reach, accessible at all times and ideally be within two minutes walking distance from wherever people work or play.

For each minute, that a person is left untreated in cardiac arrest, the chance of survival drops by about ten percent. Even if they are alerted immediately, emergency teams take some time to arrive. For this reason, automated external defibrillators have been placed in locations where they are easily accessible, such as airports, gyms and hotels.

The St John First Aid Defibrillator - G5

Automated External Defibrillator (AED)

Simple, effective and ready to help you save lives

Ready For The Rescue

Real-Time CPR Feedback
Rescue Ready and Rugged
User-Paced Rescue Prompts
Proven Technology

The **St John Ambulance G5** guides you through the entire rescue with clear voice and text prompts, allowing you to finish each critical task at your own pace. When a shockable heart rhythm is detected, the device will deliver a shock as needed.

Intellisense™ Defibrillation Pads

Pads can be placed in either location on the chest for simple, fast placement.

RescueCoach™

User-paced voice and text prompts guide rescuers through each critical step of the rescue, including CPR instruction.

USB Data Download

90 minutes of rescue data available via USB download.

Paediatric Capabilities

Paediatric pads automatically alter the shock capacity needed for paediatric victims.

Automatic Self-Testing

Conducts daily self-tests on pads, battery and internal circuitry to ensure your AED is always Rescue Ready®.

Intellisense™ CPR Feedback

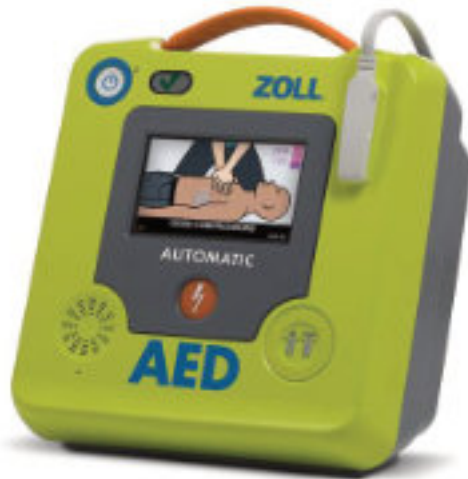

Distinct text and voice corrective CPR prompts for rate, depth and recoil.

Bright Backlit Text Display

Displays rescue prompts and critical rescue information.
